Case Study PREMIUMPACK

“

cargo-partner has been supporting us with quality logistics solutions for our transports to all regions of the world for several years. We especially appreciate the personal consultation which helps us master even difficult situations together.

[Michel Szczepanski – CEO, PREMIUMPACK GmbH]

”

Comprehensive Transport Service for Packaging Materials

Company: PREMIUMPACK GmbH
Industry: Manufacturing

Services provided by cargo-partner:
Air Cargo, Sea Cargo,
Road Transport, eFulfillment

Company Profile

PREMIUMPACK is an Austrian company based in Vienna with production facilities in immediate vicinity to the company headquarters. As an innovative manufacturer of packaging materials, the company produces shrink bags for various foodstuffs which are sold worldwide. PREMIUMPACK's products significantly contribute to conserving the taste, appearance and shelf life of fresh foods.

Initial Situation

To manage the transport of its products to customers around the world, PREMIUMPACK was looking for a reliable logistics provider who could offer an optimal solution for each order, no matter the transport volume or destination. In addition, the company required a logistics partner who could ensure full transparency throughout the entire supply chain.

Solutions

The cooperation between PREMIUMPACK and cargo-partner began in 2013 and includes regular worldwide air, sea and road transports. PREMIUMPACK places high demands on its logistics partner: Flexible solutions are just as important as timeliness and frequent transport status updates. To keep an optimal overview of their numerous shipments, cargo-partner and the packaging manufacturer rely on SPOT. The SPOT Visibility & Collaboration Platform enables simple communication, tracking in real time, comprehensive reporting as well as efficient document and information management. PREMIUMPACK's customers often have special requirements in regard to transport conditions, particularly concerning temperature, humidity and transport routes. To offer the best possible solutions for the consignees of PREMIUMPACK's goods, cargo-partner offers tailor-made services utilizing temperature-controlled containers.
