

Case Study Webasto

“

We have very specific requirements in our parts logistics operations, and we are very satisfied with the flexible solutions provided by cargo-partner. In addition to the timely delivery of all parts, the pre-sorting facilitates our production process.

[Vladimir Lauko – Logistic Manager, Webasto Convertibles Slovakia, s.r.o.]

Slovakia, s.r.o.**

Industry: Automotive & Spare Parts

**Services provided by cargo-partner:
Contract Logistics,
Value Added Services,
Supply Chain Management,
Road Transport**

Company Profile

The Webasto Group with headquarters in Stockdorf near Munich is a global innovative systems partner to almost all automobile manufacturers and is among the top 100 suppliers in this sector worldwide. Webasto has more than 50 locations around the globe, 30 of which are production sites.

Initial Situation

The cooperation began in 2014 and is constantly being expanded. When Webasto increased the production volume at one of its factories in Slovakia, the company urgently required expertly managed storage space. Webasto was confident that cargo-partner was equipped to meet the company's strict requirements and specialized logistics demands. In addition, the cargo-partner logistics facility in Dunajská Streda with 14,200 m² of storage space was a convenient choice due to its proximity to the Webasto production facility.

Solutions

cargo-partner provides Websto with storage space and personnel services as well as dedicated work areas for Webasto staff. These members of the Webasto logistics department ensure quality control according to the company's specifications. Most recently, Webasto launched a pilot project in cooperation with cargo-partner called "External Production Supermarket": In the scope of this innovative project, the components are forwarded directly from the cargo-partner warehouse to the production line of Webasto's assembly plant, obliterating the need for a prior preparation step in the Webasto sub-warehouse. The individual manufacturing elements are presorted in the cargo-partner warehouse and assembled on special trolleys so that manufacturing can proceed smoothly and quickly.
